

Associate Scientist – APAC Fast Track

Help us improve access to life-changing therapies that can transform human health.

We are Cytiva, a global provider of technologies and services that advance and accelerate the development and manufacture of therapeutics. Formerly part of GE Healthcare, we have a rich heritage tracing back hundreds of years, and a fresh beginning since 2020.

Our customers undertake life-saving activities. These range from fundamental biological research to developing innovative vaccines, biologic drugs, and novel cell and gene therapies. Our job is to supply the tools and services - the pots, pans, soups and sauces - they need to work better, faster and safer, leading to better patient outcomes.

What you'll do

- Lead the Fast Trak team in the APAC region based in Incheon, Songdo in alignment with the global vision and strategic plan
- Performs research (biology, chemistry, mechanical, software, etc.) to generate analytical data for internal and/or external clients.
- Responsible for the investigation of new technologies and experimentation directed at the practical application of scientific theories.
- Assures that programs meet scientific objectives and are aligned with customer needs.
- Builds relationships with industry/technology key opinion leaders.

Who you are

- Bachelor's degree in Life Sciences, Chemical Engineering or related Life Sciences field; advanced degree preferred
- Experience with purification process development of monoclonal antibody, recombinant protein, or vaccines in an industry setting
- Understanding of principles and theory behind unit operations for processing biologicals with knowledge in principles of scale-up, validation, single-use, hybrid and traditional set ups
- Experience in GMP manufacturing and working knowledge of FDA/EMEA regulations for biologics including experience in CMC documentation preferred
- Conversational level English language proficiency, with demonstrated ability to work in a collaborative, matrixed, and customer focused environment

Who we are :

Whatever your role, we bring purpose and challenge into our everyday work. If you are driven to make the world a better place thanks to science and medicine, you'll feel right at home here. If

you're flexible, curious and relentless, you'll belong. If you are excited about a global culture, this can be the place to further your career.

Cytiva is a global life sciences leader with over 7000 associates across 40 countries who are dedicated to our mission to advance and accelerate therapeutics. As a trusted partner to customers that range in scale and scope, Cytiva brings efficiencies to research and manufacturing workflows, ensuring the development, manufacture and delivery of transformative medicines to patients.

Cytiva is part of the Danaher family of life sciences companies, a global science and technology innovator committed to helping customers solve complex challenges and improving quality of life around the world. As part of a greater Life Sciences platform, you'll redefine what it means to innovate every day. Pioneering the future of science, research, and medicine gives you unlimited opportunities to find the next breakthrough that will best serve scientists and medical professionals in the fight to save lives.

Danaher Corporation and all Danaher Companies are equal opportunity employers that evaluate qualified applicants without regard to race, color, national origin, religion, sex, age, marital status, disability, veteran status, sexual orientation, gender identity, or other characteristics protected by law. The "EEO is the Law" poster is available [here](#).
